

Suraj Chauhan

Data Analyst — Research Analyst — Power BI Developer — Python Developer

Portfolio — GitHub — LinkedIn — Email — Phone

Professional Summary

BCA graduate with hands-on experience in Data Analysis, Python, SQL, Excel, and Power BI. Proven ability to clean and transform large datasets, build KPI dashboards, conduct market research, and generate actionable business insights. Seeking Data Analyst or Research Analyst roles where analytical thinking and data-driven decision-making create real business impact.

Technical Skills

Programming Languages	Python, SQL, JavaScript, HTML, CSS
Data Analytics	Data Cleaning, Exploratory Data Analysis (EDA), ETL, Statistical Analysis, Trend Analysis, KPI Reporting, Data Interpretation
Libraries & Tools	Pandas, NumPy, Matplotlib, Power BI, Excel (Advanced), Git, GitHub
Databases	MySQL, MongoDB
Research Skills	Market Research, Competitor Analysis, Secondary Research, Web Research, Insight Generation, Report Writing, Data Storytelling
Business Intelligence	Dashboard Development, Data Modeling, Automated Reporting, KPI Tracking
Frameworks	React.js, Node.js, Express.js, Tailwind CSS
Soft Skills	Analytical Thinking, Communication, Problem Solving, Team Collaboration, Adaptability

Work Experience

Retail Operations Intern2024 – 2025

- Managed and analyzed daily sales, billing, and inventory datasets to support reporting and stock optimization decisions in a fast-paced retail environment.
- Designed Excel-based operational reports and transaction tracking templates, streamlining data entry and reducing repetitive manual work across daily reporting cycles.
- Monitored inventory movement and stock trends to assist replenishment planning, helping identify slow-moving and high-demand product categories.
- Collaborated with team members to improve workflow coordination and operational consistency during peak business periods.
- Gained hands-on exposure to business reporting workflows, operational data management, and data-driven decision-making in a real-world retail setting.

Projects

Blinkit Sales Analysis DashboardDemo — GitHub

- Analyzed 10,000+ rows of grocery sales data using SQL, Excel, Python, and Power BI, uncovering 5 key revenue trends across product categories.
- Built interactive Power BI dashboards covering regional sales performance, customer ratings, and category-wise analysis to enable faster, self-service reporting for stakeholders.
- Executed a complete ETL pipeline — data extraction, cleaning, transformation, and visualization — ensuring high data quality and consistency throughout the analysis workflow.
- Conducted KPI reporting and competitor-style market analysis to identify customer purchasing behavior patterns and seasonal demand trends.
- Deployed analytics website via GitHub Pages, enabling portfolio-ready public access for recruiters and collaborators.
- Tech Stack:** Power BI, SQL, Excel, Python, Pandas, GitHub Pages

Netflix Data Analysis & Recommendation InsightsDemo — GitHub

- Conducted exploratory data analysis (EDA) on 5,500+ Netflix records covering genre, ratings, release year, popularity scores, and country-wise viewer trends.
- Performed thorough data cleaning and preprocessing on 5,500+ records using Python, Pandas, and NumPy, resolving missing values, duplicates, and formatting inconsistencies.
- Generated 12+ visual analytics charts including genre distribution, yearly content growth, and viewer rating breakdowns, enabling clear insight generation for stakeholders.

- Applied statistical trend analysis to identify audience preferences, genre saturation patterns, and content recommendation insights.
- Automated reporting and visualization workflows using Matplotlib, enabling reproducible chart generation and consistent output across multiple analysis runs.
- **Tech Stack:** Python, Pandas, NumPy, Matplotlib, Power BI, GitHub Pages

AuraBot — Full-Stack AI Chatbot & Telemetry Analytics

Demo — GitHub

- Developed a full-stack AI chatbot platform with intelligent conversational workflows; integrated telemetry tracking to monitor 10+ engagement and usage metrics in real time.
- Built a responsive ChatGPT-style interface with authentication, chat history management, and dark-mode UI — reducing user onboarding friction with mock demo mode for instant recruiter testing.
- Implemented telemetry analytics dashboards tracking chatbot usage patterns, session depth, and interaction frequency, enabling data-driven UX improvements.
- Designed scalable frontend and backend architecture using React.js, Node.js, and Express.js with reusable component-based structure, reducing feature integration time.
- **Tech Stack:** React.js, Node.js, Express.js, Tailwind CSS, JavaScript, REST APIs, AI Integration, Netlify, GitHub

Education

Bachelor of Computer Applications (BCA)	2022 – 2025
Uttarakhand Open University	CGPA: 7.6
Intermediate (12th Grade)	2023
Maharishi Vidya Mandir	76%

Certifications

- Retail Associate Certification — Completed
- Advanced Excel for Data Analytics — Udemy (Completed)
- Microsoft Power BI Data Analyst Associate (PL-300) — In Progress
- SQL for Data Analysis — Coursera / Udemy (In Progress)

Achievements

- Built 3+ end-to-end analytics projects using Power BI, Python, SQL, and Excel analyzing 15,000+ rows of real-world data for KPI reporting and business intelligence.
- Automated reporting workflows across projects, achieving estimated 30–60% reduction in manual data processing and chart generation time.
- Deployed 3 portfolio-ready analytics and AI-based web applications publicly accessible for recruiter evaluation.
- Developed full ETL pipelines from raw data extraction to cleaned, visualized insights — consistently achieving 95%+ data accuracy post-processing.
